JFORCE BİLİŞİM TEKNOLOJİLERİ A.Ş.

Our ambition is to invest more into competition in the growing **Digital Innovation**, which last year was a 1.2 trillion USD total worldwide market.

We are an **end-to-end system integrator and full-scale software development house** with differentiating ourselves by a holistic and relational view to the IT architecture and business strategies.

Our company JForce, is aiming to develop **"Cognitive IT Architecture for Digital Journey"** to help innovators in establishing their digital foundations with our dedication to excellence in project delivery, program management and client relations.

Through an expert team of **IT Architects and strong software development skills** we are collaborating with our clients in their **automation, integration and data & AI initiatives** along with consulting experience in application and microservices transformation, platform and infrastructure modernization for their journey to cloud.

We are looking for **"not clients but strategic partners"** to mutually collaborate in developing **cognitive IT architectural models** that would help us all building innovative business models for better time to market, leaner process automation, profitable data monetization and reliable & easy to use IT infrastructures
